

Packing & Shipping Information

Packing Unless agreed to in advance, please pack all material in UN approved 200 litre (45 gallon) drums. These should be polylined, ringed and sealed and be suitable for mechanical handling. The drums should be secured on pallets (treated according to ISPM 15, if wood) Please make sure all drums are labelled correctly for transport & handling.

Documentation For all material received, we require the following paperwork to be sent with the goods and copies sent electronically to the customer service office.

A Material Safety Data Sheet (MSDS)

Packing List to include: (Example overleaf)	Number of Containers Gross & Nett Weights Advised Contents or Assays
--	--

Additional documentation will be needed depending on material type and origin, as follows:

From UK A Waste Transfer Note if non-hazardous or A Hazardous Waste Consignment Note
A Dangerous Goods Note if applicable.

Europe For all "Green" Material (as classified by the customer), a "Green Contract" (Annex VII) should be in place with Johnson Matthey and a "Green Tracking Document" should accompany each shipment.

For "Amber" material (under a valid authorised Notification), a completed "Amber Tracking Document" showing EWC/OECD Codes and a Dangerous Goods Note if applicable.

For "REACH" registered material a copy of the REACH document including the REACH Registration Number.

Outside Europe Green & Amber materials as above.

For REACH materials, as above or under an agreed JM REACH registered number.

A Dangerous Goods Note if applicable.
